PROFILE

Software Developer with 3+ years of commercial experience building and maintaining enterprise applications using C#, .NET, ASP.NET Core, ASP.NET MVC, Web APIs, SQL Server, and Entity Framework Core. Experienced in developing backend services, data-driven applications, RESTful APIs, and business-critical enterprise systems across banking, ERP, campus management, HR, and healthcare domains.

Strong hands-on experience in debugging production issues, tracing application problems to root cause, optimizing SQL queries and application performance, and working with inherited and legacy codebases. Familiar with Dependency Injection, SOLID principles, design patterns, asynchronous programming, middleware, secure authentication, and API development. Experienced throughout the software lifecycle, from requirements and implementation through deployment, troubleshooting, optimization, and production support.

Actively use AI-assisted development tools including GitHub Copilot, Cursor, and Claude to improve development productivity, investigate problems, understand unfamiliar code, and accelerate implementation while applying engineering judgment for solutions.

EXPERIENCE

E-Creatorz May 2023 – Present | Karachi, Pakistan

Software Developer

- Design, develop, maintain, and enhance enterprise applications using C#, .NET, ASP.NET Core, ASP.NET MVC, ASP.NET WebForms, Web APIs, Entity Framework, LINQ, SQL Server, JavaScript, HTML, and CSS.
- Work across the software development lifecycle, including requirements analysis, implementation, debugging, deployment, performance optimization, production support, and maintenance of business-critical applications.
- Work extensively with existing and legacy codebases, tracing application behavior, understanding existing business logic, safely implementing enhancements, and refactoring components to improve maintainability and reliability.
- Investigate production defects through structured debugging and root-cause analysis, resolving application, API, database, and integration issues while minimizing disruption to live enterprise systems.
- Develop and integrate RESTful APIs for enterprise and banking applications, implementing business logic, authentication, authorization, data validation, and secure transaction workflows.
- Design and optimize SQL Server queries, stored procedures, indexes, and database operations to improve application performance and reporting efficiency.
- Apply software engineering practices including Dependency Injection, SOLID principles, design patterns, LINQ, asynchronous programming, middleware, and layered application design.
- Develop and maintain Campus Management and ERP functionality covering student registration, academic management, fee management, reporting, surveys, attendance, assessments, Payroll, HRM, Supply Chain Management, and Hospital Management.
- Develop banking transaction workflows supporting Maker, Checker, Signatory, and Releasor authorization processes for enterprise banking applications.
- Develop cross-platform mobile functionality using .NET MAUI and React Native while integrating backend APIs and enterprise authentication workflows.
- Collaborate with QA, business stakeholders, and cross-functional teams to understand requirements, reproduce defects, validate fixes, and deliver production-ready features.
- Use Postman, Swagger, Visual Studio, GitHub Copilot, Cursor, and Claude for development, debugging, API testing, version control, code exploration, and AI-assisted engineering workflows.
- Successfully contributed to 15+ ERP/CMS modules serving thousands of students and staff.

SKILLS

Backend Technologies
C#, .NET, .NET Core, ASP.NET Core, ASP.NET MVC, ASP.NET WebForms, ASP.NET Web API, Entity Framework, LINQ, RESTful APIs, Dependency Injection, SOLID Principles, Design Patterns, Middleware, Async/Await, Minimal APIs, C++, Python, JWT Authentication, OAuth, API Integration

Frontend
JavaScript, HTML5, CSS3, React Native, .NET MAUI

Tools & Platforms
Git, GitHub, Visual Studio, Postman, Swagger, GitHub Copilot, Cursor, Claude

Database & Query Optimization
SQL Server, T-SQL, Stored Procedures, Query Optimization, Index Optimization, Query Execution Plans, Performance Tuning, Transactions, ACID, Database Normalization

Software Engineering
Object-Oriented Programming, Debugging, Root-Cause Analysis, Production Support, Legacy Code Maintenance, Application Performance Optimization, Secure Authentication

Messaging & Distributed Systems Knowledge
Apache Kafka, RabbitMQ, Message Queues, Event-Driven Architecture, Asynchronous Processing

EDUCATION

Master of Science in Data Science (MSDS)
NED University of Engineering and Technology
Jan 2026 – Present
Relevant Areas of Study:
- Statistics for Data Science
- Data Science Tools & Techniques
- Machine Learning

Bachelor of Science in Computer Science (BSCS)
PAF KIET Main Campus Korangi Creek
Sep 2020 – Jun 2024
CGPA: 3.06 / 4.00
Relevant Coursework:
- Data Structures & Algorithms
- Database Management Systems (DBMS)
- Machine Learning & Data Science
- Computer Organization & Architecture
- Entity Framework & MVC
- Blockchain Research Paper
- Research on NP-Hard Two-Dimensional Bin Packing Problem

CERTIFICATIONS & ACHIEVEMENTS

Certifications
- C# (Basic) Certification — HackerRank

Academic & Technical Achievements
- 5★ Python — HackerRank
- 4★ Problem Solving — HackerRank
- 3★ SQL — HackerRank
- Winner — AWS Hackathon, Master Mind Category
- 1st Position — Flair'22 Network Designing Competition
- Runner-Up — Pakistan Day Programming Competition (2022)
- Runner-Up — E-Code Chef Speed Programming Competition (2021)

Leadership & Competitions
- Head of Delegate Affairs — YMNA V Leadership Conference (2025)
- Director of Guest & Protocol — YMNA IV Leadership Conference (2023)
- Head of Programming & Deputy Marketing Manager — Kiet Technological Fair (2022)
- Special Mention — YMNA III, "Development in IT and Human Rights" (2023)

PROJECTS

Net 2 Bank Nov 2024 – Present
React Native | Enterprise Banking Application (E-Creatorz)
Developing secure banking workflow features for transaction processing applications using React Native, including Maker, Checker, Signatory, and Releasor authorization processes for IBFT, IFT, and cheque-based transactions.

Edu-Smartz Campus Management System (CMS) May 2023 – Present
ASP.NET, SQL Server, WebForms (E-Creatorz)
Contributed to the development and maintenance of enterprise campus management functionalities including student registration, fee management, reporting, surveys, trusted device authentication, and academic operations.

Ebiz-Smartz Enterprise Resource Planning (ERP) May 2023 – Present
ASP.NET, SQL Server (E-Creatorz)
Worked on ERP functionalities covering Payroll, Human Resource Management (HRM), Supply Chain Management (SCM), Purchase Requisition, and Hospital Management systems for enterprise administrative operations.

Edu-Smartz (Student Portal) May 2023 – Present
.NET, MAUI, ASP.NET (E-Creatorz)
Implemented web and mobile portal features including attendance tracking, assessment results, student ledger, roadmap, course management, and LMS functionalities using .NET and MAUI.

Edu-Smartz (Faculty Portal) May 2023 – Present
ASP.NET, SQL Server (E-Creatorz)
Worked on faculty portal functionalities including attendance management, surveys, academic tracking, and LMS-related features for enterprise academic systems.

Intelligent Space Optimization and Bin Packing Research Oct 2023 – Aug 2024
ASP.NET, Python (FYP)
Researched the NP-hard Two-Dimensional Bin Packing Problem (2D-BPP) and developed an intelligent space optimization system that combined optimization algorithms with image recognition techniques. The system analyzed user-defined objects, identified hand-drawn inputs, and generated optimized placement strategies to maximize container space utilization.

Concurrent File Access Control System Jun 2023 – Oct 2023
C++ (P&DC)
Implemented a multithreading-based file access control system using mutex synchronization mechanisms to manage concurrent file operations and prevent race conditions during file access.

CODE FUSION Sep 2022 – Jan 2023
Python (Cryptography and Discrete Mathematics)
Implemented file encryption and decryption functionality using custom encryption techniques for secure handling of multiple file formats.

Water Distribution Management System Feb 2022 – Jun 2022
ASP.NET, MVC, SQL Server (DBMS)
Built a web-based management system supporting user authentication, product management, and order processing functionalities using ASP.NET MVC and SQL Server.
